

Cersi now Produce Computers for ORMAE ... CERSI (Center European of Research Science Informatics) was founded on 01 December 1999, Geneva, Switzerland by Prof. W.M. HORSTMANN . With Objective! The advancement of computer Science & Software Engineering

C

This Research center under leadership of Chief Scientific Prof. W.M. HORSTMANN, has developed Mos64 1.0, were as **MOS** stands for **Multi Operating System** and that's precisely what it is ! It run all UNIX, Linux, Mac OSX, Microsoft XX, Atari, PSII & PSIII, Nintendo name it it is! It is just unbelievably fast, EXTREMELY SECURE and runs up-to 15 times Faster (on net-books constructed for Microsoft 7x)than Microsoft 7x it self's! Iovu Mos64 1.0, Euro Mos64 1.0, Swiss Mos64 1.0, Una Mos64 1.0 and French Mos64 1.0 are just some of the Distributions using Mos64 1.0 Kernel! Our Research Team strives to develop a multitude of software packages to render Mos64 1.0 more powerful and User satisfying ! All Commercial Software has a Free Software solution equals or better than your dreadfully paid Software! says Prof. W.M. HORSTMANN. Our Research & Development team has just completed a tedious job of over 226(mostly 2D & 3D Graphics)games a must for any OS.

The MOS Difference

Cersi now Produce Computers for **ORMAE** at a mere cost of 37.50€ piece(as seen below with Cersi Mos installed) price exclude mouse and keyboard ... CERSI is a non-profit organization dedicated to keeping the power of the OS in peoples hands. A global organization of users, contributors, developers and scientist's working to innovate on your behalf. When you use Mos, you become a part of that organization, helping us build a brighter future for the Worlds Fastest and most Secure Operating System.

We present

you : Cersi Mos All in One PC (21") (HMT2160AGOS)
